Report of an Independent Registered Public Accounting Firm

To the shareholders and the board of directors of OMEGA RESOURCES, INC. AND SUBSIDIARY.

Introduction

We have reviewed the accompanying consolidated balance sheets of OMEGA RESOURCES, INC. AND SUBSIDIARY (the "Company") as of March 31, 2025, the related statements of operations, changes in shareholders' equity and cash flows, for the three-month period then ended, and a summary of the significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of this interim financial information in accordance with U.S. generally accepted accounting principles.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagement 2410, Review of Interim Financial Information performed by the Independent Auditor of the entity. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information does not give a true and fair view of the financial position of the entity as at March 31, 2025, and of its financial performance and its cashflows for the three-month period then ended in accordance with U.S. generally accepted accounting principles.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business - The Company is an investment company. The Company is pursuing commercial real estate developments and acquisitions. The Company is also engaged in oil and gas extraction and is currently producing and selling oil and natural gas.

Basis of Presentation - The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the U.S. ("GAAP").

Cash and Cash Equivalents - The Company considers all highly liquid investments with a maturity of three months or less, when purchased, to be cash equivalents and classifies such amounts as cash.

Oil & Gas Properties – Costs of oil and gas properties are capitalized at cost and depleted based on extraction using the cost depletion method.

Estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain amounts and disclosures. Actual results could differ from those estimates.

Income Taxes - Under ASC 740, "Income Taxes," deferred tax assets and liabilities are recognized for future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Valuation allowances are provided when it is more likely than not that some or all of the deferred tax assets will not be realized.

Fair Value Measurements - The Company adopted the provisions of ASC Topic 820, "Fair Value Measurements and Disclosures", which defines fair value as used in numerous accounting pronouncements, establishes a framework for measuring fair value and expands disclosure of fair value measurements.

The estimated fair value of certain financial instruments, including payables to related parties, and accounts payable and accrued expenses are carried at historical cost basis, which approximates their fair values because of the short-term nature of these instruments.

ASC 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 describes three levels of inputs that be used to measure fair value:

Level 1 - quoted prices in active markets for identical assets or

Level 2 - quoted prices for similar assets and liabilities in active markets or inputs that are observable

Level 3 - inputs that are unobservable (for example cash flow modeling inputs based on assumptions)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Fair Value Measurements - The Company's financial liabilities are measured at fair value and include its notes payable. These liabilities are subject to the measurement and disclosure requirements of ASC 820 and are considered to be Level 3 inputs.

Related Parties - The Company follows ASC 850, Related Party Disclosures, for the identification of related parties and disclosure of related party transactions.

Share-based Expense - ASC 718, "Compensation – Stock Compensation", prescribes accounting and reporting standards for all share-based payment transactions in which employee services are acquired. Transactions include incurring liabilities, or issuing or offering to issue shares, options, and other equity instruments such as employee stock ownership plans and stock appreciation rights. Share-based payments to employees, including grants of employee stock options, are recognized as compensation expense in the financial statements based on their fair values. That expense is recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period).

The Company accounts for stock-based compensation issued to non-employees and consultants in accordance with the provisions of ASC 505-50, "Equity – Based Payments to Non-Employees." Measurement of share-based payment transactions with non-employees is based on the fair value of whichever is more reliably measurable: (a) the goods or services received; or (b) the equity instruments issued. The fair value of the share-based payment transaction is determined at the earlier of performance commitment date or performance completion date.

The Company had no stock-based compensation plans as of March 31, 2025 and December 31, 2024.

Earnings Per Share - FASB ASC 260, "Earnings Per Share" provides for calculation of "basic" and "diluted" earnings per share. Basic earnings per share include no dilution and are computed by dividing net income (loss) available to common shareholders by the weighted average common shares outstanding for the period. Diluted earnings per share reflect the potential dilution of securities that could share in the earnings of an entity similar to fully diluted earnings per share. Basic and diluted loss per share were the same, at the reporting dates, as there were no common stock equivalents outstanding.

Revenue Recognition - Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectability is probable. Revenue generally is recognized net of allowances for returns and any taxes collected from customers and subsequently remitted to governmental authorities.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue Recognition - In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), specifically ASC 606-10-50-12. This standard provides a single set of guidelines for revenue recognition to be used across all industries and requires additional disclosures. The updated guidance introduces a five-step model to achieve its core principle of the entity recognizing revenue to depict the transfer of goods or services to customers at an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The Company adopted the updated guidance effective January 1, 2019, using the full retrospective method, however the new standard did not have a material impact on its consolidated financial position and consolidated results of operations, as it did not change the manner or timing of recognizing revenue.

Reclassification – Certain amounts in the prior year financial statements have been reclassified to conform to the current year presentation.

2. REVENUE RECOGNITION

The Company recognizes revenue as gas is produced and distributed. The Company recognized revenues of $2,556 and $14,652, for the periods ending March 31, 2025 and December 31, 2024, respectively.

3. RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In February 2016, the FASB issued ASU 2016-00, Leases. The ASU introduces a lessee model that brings most leases on the balance sheet. The new standard also aligns many of the underlying principles of the new lessor model with those in the current accounting guidance as well as the FASB's new revenue recognition standard. However, the ASU eliminates the use of bright-line tests in determining lease classification as required in the current guidance. The ASU also requires additional qualitative disclosures along with specific quantitative disclosures to better enable users of financial statements to assess the amount, timing, and uncertainty of cash flows arising from leases. The Company has adopted ASU No. 2016-02, Leases (Topic 842), as of January 1, 2019, and will account for their lease in terms of the right of use assets and offsetting lease liability obligations for this new lease under this pronouncement. The adoption of this guidance had no material impact on the financial statements.

In December 2019, the FASB issued ASU- 2019-12, Income Taxes. The new standard was issued to simplify the accounting for income taxes. The guidance eliminates certain exceptions related to the approach for intra period tax allocation, the methodology for calculating income taxes in an interim period, and the recognition of deferred tax liabilities for outside basis differences related to changes in ownership of equity method investments and foreign subsidiaries. The guidance also simplifies aspects of accounting for franchise taxes and enacted changes in tax laws or rates and clarifies the accounting for transactions that result in a step-up in the tax basis of goodwill. The standard will be effective for us beginning July 1, 2021, with early adoption permitted. We are currently evaluating the impact of this standard in the financial statements, including accounting policies, processes, and systems. There were other updates recently issued, most of which represent technical corrections to the accounting literature or application to specific industries or transactions that are not expected to have a material impact on the Company’s financial position, results of operations or cash flows.

4. INVESTMENT IN SUBSIDIARY

On August 26, 2024, Omega Mid-Continent was created as an Oklahoma limited liability company, wholly owned by the Company. The purpose of the establishment of this entity is to take over operations of wells in the future. The entity has been fully funded by the Company. Due to the lack of transactions on Omega Mid-Continent, there are no financials to be consolidated with the Company for the period ending March 31, 2025 and December 31, 2024.

5. FIXED ASSETS & OIL AND GAS PROPERTIES

Fixed assets are stated at cost and depreciated over their estimate useful lives of the assets. Depreciation is computer using the straight-line method for financial reporting purposes. Additions and betterments are capitalized, whereas costs of maintenance and repairs are charged to expense as incurred.

Costs of oil and gas properties are capitalized using the full cost method and are then written off through depletion based on actual production compared to estimated reserves.

See Note #12 for more information on return of common stock that was originally issued for oil and gas properties.

For the periods ending March 31, 2025, and December 31, 2024, there was depletion recorded for oil and gas wells that did have oil production during the period. For the periods ending March 31, 2025, and December 31, 2024, the company has depletion expense of $0 and $1,103, respectively.

6. RAW WATER RIGHTS

When these land parcels were contributed to the Company in exchange for stock in Omega, the Company also received rights for the raw water necessary to complete a 56 unit apartment project (up to 33.6 Units of Colorado Big Thompson “CBT” water) on one parcel, and (up to 20.2 Units of CBT water) for a second parcel that will accommodate up to 22,000 square feet of commercial/retail/service buildings.

7. DEBT
